

THE ART, DESIGN & TECHNOLOGY FACULTY

Students are exposed to our values from the first day they are greeted with a friendly hello in Year 7. In the ADT faculty, we hold these values to the same high standards.

INTRODUCTION

Each subject in the faculty, from Art & Design, to Food, to Design and Technology aims to provide our learners with opportunities to be successful students, but more importantly successful members of their local and wider communities. Our collective aim is to develop learners that are creative, inquisitive, focused, resilient, culturally aware and kind.

CURRICULUM

While our curriculum provides challenge and opportunity academically, we take opportunities to develop our learners culturally, socially and morally.

Our curriculum is designed to allow learners to follow all pathways into successful futures. As well as a dynamic Key Stage 3, closely following the National Curriculum, students have a wide range of options to choose from at Key Stage 4 and 5. These include:

- GCSE Art & Design
- GCSE Design and Technology
- GCSE Food Preparation & Nutrition
- Level 1/2 Construction
- Level 1/2 Hospitality and Catering
- A Level Art & Design
- A Level Design & Technology
- Level 3 Food Science

THE DEPARTMENT

In ADT, we aim to use our position of immense privilege to teach our students how to be the best version of themselves. To teach them to be mindful of others, kind to each other and themselves while providing them with the tools to be positive members of society. By definition, ADT is about shaping the future. We see it as our responsibility to give our students the confidence to shape their own successful future.
